As requested, I would like to tell you about two hotels in my area. There are two types of hotels for two types of tourists. These hotels both have their advantages and disadvantages. You can choose hotel that suits exactly for you.

The first hotel is suitable for people who want to see the town and for those who just want to take some amazing photos. This hotel offers you free exhibition around the town. Also ~~a~~ hotel offers you tickets to the local theatre on sale bargain price. Hotel~~s~~ has large and comfortable apartments with fridge, microwave and all what you need. For extra price you can buy a ~~VIP-~~ ~~lounge~~ VIP-lounge and it has an astonishing view on the town. But I also can admit that the personnel is rude and the air is polluted there. Second hotel matches to active tourists because it is situated in the countryside, right at the bottom of mountain. You can ~~rent~~ a bike and ride to the top of the mountain. Also hotel offers you some lessons with professional skydiver. The problem is that the rooms are tiny and the whole capacity of the hotel is very small. To conclude, these two hotels are worth visiting. But you have to choose wisely what kind of journey you want.

$$\frac{1}{2} \left(\frac{1}{2} + \frac{1}{2} \right) = \frac{1}{2}$$
